Office Action Summary

Art Unit: 1774

1. Claims 1,5, 7, 9-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohbayashi et al.

The "an the like" phrase referred to by applicants is deemed to modify "inorganic particles", not "silica". Like inorganic particles are disclosed in column 13, lines 35-44 and include alumina (line 42). There is no discussion of silicon-containing particles which are like silica.

It is acknowledged that applicants' specification examples establish that unexpected results are obtained with alumina particles surface. ^{treating with a silane coupling agent.} None of applicants' claims are commensurate with this disclosure.

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
